Applications

Maxima 30 is an accent light defined for use with PAR30 retrofit LED lamps. MAX is a family of gracefully proportioned cylinders designed for low to very high ceilings.

Features

- Signature Low Aperture Brightness: Expertly engineered optical system
 produces extremely low aperture brightness, desired by museums,
 galleries, and other architectural applications
- A concealed swivel provides 385° horizontal rotation and 0-90° tilt. The swivel is permanently tensioned, allowing the luminaire to remain fixed at the desired angle
- An integral reflector and a matte black Ring Baffle increases beam control, eliminates spill light, and minimizes glare
- Assembly is fixed in place and can be removed as a unit for relamping

Cross Baffle (MAX-30-O-OX)

- The Cross Baffle is preferred by museums, which require low-glare illumination and quiet ceilings
- Eliminates glare; controls stray light; and conceals the source from normal viewing angles
