FIVE HI XTM AA

recessed LED accent light

FEATURES

- FIVE HI XTM AA is a 5" aperture LED accent light.** Luminaire is powered by one of a number of Xicato 19 mm XTM LED modules, distinguished by color consistency (within 1x2-step MacAdam ellipse). See tables below for wattages and efficacies. Luminaire may be ordered with one of a number of drivers.
- Luminaire employs an internal 'twist and lock' reflector** to produce an initial beamspread of 20°, 40° or 60°. To allow beamspread to be changed in installed luminaires, internal reflectors are available as accessories. Precise reflector design minimizes aperture brightness.
- Luminaire provides 363° horizontal rotation and 0°- 35° angular adjustment** with lockable focus.
- Luminaire accepts one or two of a number of Optical Accessories** including lenses and color filters. Complimentary prismatic lens included.
- External reflectors are available in clear natural aluminum finishes** — semi-specular (C), slightly diffuse (V) or fully diffuse (EC) — or champagne gold, black Alzak® or white. Other finishes available on special order.
- Housing is constructed from 14-gauge and 16-gauge electro-zinc steel** in Edison Price Lighting's American factory. Heavy-gauge metals and American manufacturing guarantee long-lasting durability.
- Luminaire includes a pair of mounting bars** (3/4" x 27" C channel). Specialty bars for wood joists and T-bar installations are also available.
- For more information, click here.**

APPLICATIONS

Luminaire is listed for Damp Location. Fixture is prewired with an insulation detecting thermal protector. Luminaire approved for eight #12 wire 90° C branch circuit pull through wiring and is suitable for use in a fire rated ceiling. Removal of external reflector allows access to LED and junction box.

SPACING REQUIREMENT

Six models — L27A, L30A, L30S, L30V, L40S and L40V — must be spaced 30" apart (O.C.) and 15" from walls, and must have 1/2" clearance above housing.

For higher lumen packages and lower pricing, see [FOUR HI CZS AA](#).
