

FEATURES

Unicep® S is a 13" length of SightLine S track suitable for mounting and electrifying a single 120-volt Edison Price Lighting track fixture. Unicep S is designed for mounting on a 4" octagonal outlet box (by others).

Unicep S is intended for locations where the lighting program calls for the *occasional* use of a single track fixture. For sites requiring the *permanent* mounting of a single track fixture, we recommend the use of an outlet box mounted (-OBM) version of the track fixture.

Standard finish for Unicep S is matte white; also available in black and Industrial Silver matte paint finishes.

APPLICATIONS

Product is recommended for museums, galleries, showrooms, retail stores, offices, schools or residences – wherever adjustable wallwash or accent lighting is occasionally required.

Unicep S is designed to support and power a single Edison Price Lighting incandescent track fixture prepared for 20-amp, 120-volt service.

Product is 3-conductor and grounded. It is supplied by one individually switched, 120 volt, 20 amp branch circuit. Total capacity is 20 amps. Service wire must be #12 AWG solid wire.

All components are eUL^{us} listed for indoor use only.
