Lamp Module: Half-Sphere

APPLICATIONS

Office, Retail, Residential

DESCRIPTION

Modular Design — The lighting system consists of individual modules that can be easily assembled and arranged in numerous iterations, allowing users to create unique spider-like lighting structures.

Adjustable Legs — The legs of our product family are flexible and poseable, allowing designers to modify the positioning and angles of the individual modules to achieve desired spider-like poses.

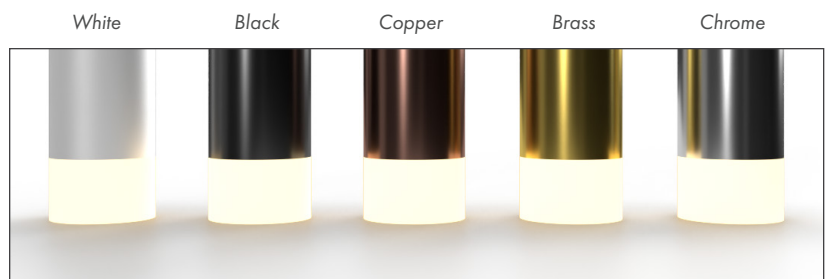

Customizable Layout — Users can adjust the placement and orientation of the lighting modules, enabling them to create various configurations and patterns.

DIY Assembly — The lighting system is designed for easy do-it-yourself assembly, with clear instructions and intuitive connectors, allowing users to enjoy the satisfaction of building their own arachne installations.
