## FREEHAND TRACK SYSTEM

## DESCRIPTION

Aircraft Cable  
Suspension

Pole-Mount  
Suspension

The **Freehand** track lighting system, available in both suspended and surface-mounted configurations, seamlessly combines functionality with aesthetic appeal. Its design features horizontal rotation, enhancing its adaptability and suitability for a variety of applications.

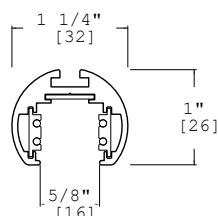

This system includes a comprehensive array of linear modules, such as diffusers, prismatic lenses, spotlights, downlights, and neon strips. These components are designed as versatile building blocks, allowing for extensive customization to meet specific lighting needs. The innovative integration of tracks with neon strip modules enables the creation of unique styles and atmospheres, transforming any space into a vibrant and engaging environment.

Ideal for designers and architects, the Neon track system facilitates creative exploration, making it a superior choice for enhancing both the utility and aesthetic quality of any project.

## FEATURES

- » Neon track system available in suspended and surface-mounted versions
- » Horizontal rotation capability for enhanced versatility
- » Diverse linear module options:
  - Diffuser, Prismatic, Spotlight, Downlight, and Neon Strips
- » Modules can be easily combined for limitless applications
- » Creative matching of track and neon strip module for captivating stylings
- » Operates on a sleek 48VDC power supply
- » Compact design with a small and exquisite 30mm diameter
- » High-quality aluminum construction ensures durability and longevity
- » Effortless installation and maintenance for convenience
- » Track system lengths in nominal 3', 6', and 10' sections
- » Track system available in powder-coated black finish
