surface mounted LED open-aperture accent light with integral dimmer

- Luminaire is designed for mounting on a 4" octagonal outlet box (by others).
- Whether operated on 120-volt or 277-service, luminaire may be dimmed
 to 10% by an integral rotary dimmer located on one side of the driver
 case. Dimmer control shaft is spring loaded, permitting shaft to be
 exposed for adjustment and then depressed flush with the driver case
 to conserve dimmer setting. 'Clock face' markings permit registration
 of dimmer setting. (See illustrations below.)
- Bluetooth controls and integral rotary dimmer can be specified together in the same fixture. Users can dim by the protocol of their choice, switching between the two options as desired.
- Driver case measures 5 1/2" long x 4" wide x 1 7/8" high.
- Beam spread is changed by removing the spring-mounted lens holder, replacing one 'twist and lock' <u>reflector</u> with another, and re-inserting the lens holder assembly. Luminaire is ordered with a single reflector; one or both of the other reflectors may be ordered as accessories.
- Luminaire provides 385° horizontal rotation and vertical adjustment from 0° to 90°. Lamp focus can be locked by tightening two collar clamps using a %4" hex key.
- Lens holder assembly accepts one or two of a number of Optical
 <u>Accessories</u> including spread lenses and color filters. Complimentary
 Beam Smoother is included. Note that, for enhanced efficiency, cross-baffles are not included. Lens holder assembly is spring-mounted for
 easy removal and adjustment.
