THREE NSP AA recessed LED narrow spot accent light

FULLY SUSTAINABLE – FULLY SUSTAINABLE – FULLY SUSTAINABLE – FULLY SUSTAINABLE – FULLY SUSTAINABLE – FULLY SUSTAINABLE – FULLY SUSTAINABLE

FEATURES

- **THREE NSP AA is a 3" aperture, LED narrow spot accent light.** Luminaire is powered by one of a number of Xicato XTS (9mm) LED modules, all of which are distinguished by extraordinary color consistency (within 1x2-step MacAdam ellipse). See tables below for wattages and efficacies. Luminaire may be ordered with one of a number of drivers.
- **Luminaire provides 362° horizontal rotation and 0°-35° angular adjustment.** Adjustments may be locked by a lever and a wing nut.
- **Luminaire employs an internal 'twist and lock' reflector** to produce an initial beamspread of 14° or 24°. To allow beamspread to be changed in installed luminaires, internal reflectors are available as accessories.
- **Luminaire includes a complimentary Beam Smoother** which may be replaced by one or two **Optical Accessories** including lenses, color filters and screens.
- **External reflectors, cut at 25°**, are available in three natural aluminum finishes – semi-specular (C), slightly diffuse (V) or fully diffuse (EC) – as well as black Alzak® and specular white enamel. Other finishes are available on special order. A LightPlate may be used instead of an external reflector.
- **Luminaire may be converted to a downlight in the field** by re-setting the angular adjustment yoke and replacing the standard external reflector with an optional 0° cut reflector.
- **Housing is constructed from 20-gauge electro-zinc, polyester-coated steel** in Edison Price Lighting's American factory. Heavy-gauge metals and American manufacturing guarantee long-lasting durability.
- **Luminaire includes a pair of mounting bars** (3/4" x 27" C channel). Specialty bars for wood and T-bar installations are also available.
- **For more information, [click here](#).**

APPLICATIONS

Luminaire is listed as an inherently protected luminaire for Damp Location. Luminaire is RoHA compliant, is suitable for use in a fire rated ceiling and is approved for ten #12 wire 90° C branch circuit wiring. Removal of the external reflector allows access to the LED module and junction box.

SPACING

Three models – L10A, L13S and L13V – must be spaced 30" apart and 15" from walls with 1/2" clearance above housing.
